Poetry.

"PEACE BE STILL!"

BY W. S. CAYFORD.

The morning star of Faith may rise,
And anticate a blissful day;
But ere Hope gilds our evening skies,
Fate sweeps the auspices away!
Yet, far above earth's sinful roll,
A voice comes greeting—"Peace be still!"

False friends may mar affection's cheer,
And envy work our overthrow;
And base deception! Pity's tear
May tend to fill our cup of woe;
Yet, 'neath the heart's pulsating thrill,
A still voice whispers—"Peace, be still!"

Misfortune's spell and Sorrow's wail
May ever in life's path intrude;
And mortal's lot must clear entail
The stings of base ingratitude!
Despite of all, from Zion's Hill
Comes the blest prompter—"Peace, be still!"

Literature.

A Night on the Ice.

Shortly after my arrival in Canada, a severe accident, received on a shooting expedition, caused me to be placed for a time under the hospitable roof of the stipendiary magistrate of Tircouaga, one of the prospective cities of the far west; and during the illness that followed, I could not have received more kindness had I been in my own house. When I left the woods the tints of autumn were flushing them with crimson and orange, as if their leaves had suddenly burst into blossom, but ere I looked at them again their glories had all vanished beneath the stern sway of the northern winter, with its train of biting frosts and deep snows, while the broad winding Tircouaga river, which I had last seen so blue and wavy, was now hushed and stilled by the universal icefetter.

To me, but recently arrived from England, it seemed strange how, amid so wild a solitude, this advent of a six or seven months' winter could be welcomed as I saw it by those around me. I did not know that winter was the only season when the bonds of their isolation were loosened, nor that the snow was the magician smoothing the difficulties of social intercourse in a district where neighbors dwelt miles apart, and the roads between them were mere lanes cut through the primeval forest, and abounding in holes, and ruts, and stumps of trees.

As soon as I was sufficiently recovered, I was the companion of Mr. Norton and his daughters in all these exchanges of courtesy; and if I cared little for the visiting, I greatly enjoyed the drives in swiftly-gliding sleighs over the gleaming snow; while instead of leaves, the trees above our heads were hung with icicles, sparkling and flashing in the sunshine, like ruby and emerald fruit and foliage of eastern story; and the long rhythmical chimes of our sleigh bells echoing through the arches of the trees, were the only sounds, save our own laughter, that broke the silence of those ancient woods.

We went to merrymakings, too—real backwoods "frolics"—held in rude barns, whose rustic decorations were essentially rustic, but where the warmth of the hospitality compensated for every deficiency; the friend of a guest was kindly welcomed, the passing traveller was pressed to stay, and the wandering merchant, with his stores of finery and news, received with delight, especially by the fair sex.—Then the home-coming was almost as merry; the long string of sleighs with their bells sounding cheerily through the midnight woods, and the joyous leave-takings of the occupants as each went his separate way.

On one occasion we had been to one of these festivities, some six or seven miles beyond the Tircouaga, and were returning, home in two light one-horse sleighs, the first containing Mr. Norton and his elder daughter, the second her sister and myself. The night was calm and beautiful in its dim snow-light, and the red glow of the northern streamers above our heads flashed and leaped in a thousand coruscations; while strangely and sweetly through the gray old woods sounded the clear girlish voices of the sisters as from the different sleighs they sang in alternate stanzas one of the quaint old ballads of the middle ages. At length we reached the banks of the Tircouaga, which lay between us and our home, a mirror of ice, and we at once commenced its passage. As we swept quickly on, it seemed to me that some other sound mingled with the firm footfalls of the horses, and the chime of their bells—a low threatening murmur like the echo of a distant tempest. But Mr. Norton drove gaily on, as if he either heard it not, or thought nothing of it, and I dismissed it from my mind, until as we drew near the centre of the river, strange dark spots, like cloud-shadows, began to fleck its beaming surface.

The next instant one appeared right on Mr. Norton's path, and too close for him to avoid. With a long leap the horse bounded over it, and as the sleigh was drawn quickly after, there was a plash that told it had struck against water. I could see Mr. Norton spring hurriedly up.

"Back, back, for your lives!" he cried to us; "the ice is breaking up!"

I turned to follow his directions, but it was too late—two or three such spots lay between us and the bank. I looked around; they were rapidly appearing on every side; and then I remembered to have heard the ice of the Tircouaga, like that of several other Canadian rivers, was treacherous in consequence of hot springs in the bed of the river, which at times burst forth; and that particularly in the early part of the winter the morning would see the river covered with ice, of which before evening not a trace would remain.

Perceiving how matters were, Mr. Norton bade us follow him, and quickly, for that not a moment was to be lost; and then dashed off at a rapid pace for the opposite bank, leaping the chasms, and [illegible] to diminish the danger; and with the same breathless speed we hastened on in his rear.

Meanwhile, larger and more numerous grew those dark blue spaces, and longer and longer and more frequent our horses' leaps. At length there came a chasm mine could not venture. I looked eagerly round for some more favorable spot; but as my eye glanced onward, it fell on constantly-widening water, until it had gone the circuit; and with a sensation of surprise and horror I perceived that we stood upon an ice island, from which the surrounding ice was rapidly retreating. I looked after Mr. Norton, but unsuspicious of what had happened, he was still making his way with arrowy speed across the ice; so I felt we were left to our own efforts for escape, and my utter inexperience rendered the chances few indeed, unless we should again draw near enough to the main ice to leap the space between; and none can tell how anxiously I watched each movement of our raft as it began to yield to the influence of the current.—But each fathom that swept down the river seemed to bear us an equal distance from its icy borders, and we soon found ourselves floating on a comparatively open space of water, and surrounded by numerous ice-islets.

I could almost have echoed poor Annie's cry of agony when the certainty of our position burst upon her, so fearful was it. Alone at midnight, on a fragment of ice, floating down a rapid river whose future course I knew not, while on each side stretched tracts of crumbling ice, and beyond them rose banks of inaccessable steepness! What could exceed the desolation of such a position, and what hope could it leave to us of life? While, to complete our misery, we had not even the power to struggle against our fate, but must passively await its coming.

How deeply I pitied my young companion, as she sat there weeping such bitter tears. It was hard for her to part with life, after sixteen years of such bright and joyous experience as hers had been; hard to lay it down thus suddenly and fearfully, absent from all she loved, and yet harder the unresolvable fears for her father's had awakened. I tried to utter words of consolation as I wrapped the poor girl in the buffalo robes from the chill night air that our inaction rendered doubly cold. She looked a sad contrast to the bright creature of the last few hours, whose joyous ballad strains were yet lingering in my ears. But when the first shock was over, poor Annie struggled bravely with her grief, and during the remainder of that long, dreary night of peril she sat calmly by my side, the most patient and resigned companion man ever had in danger.

Meanwhile, the river was bearing us swiftly on past rocky headlands, and dark pine forests, waving above lofty cliffs, on to yet wilder and sterner regions, where it seemed even the red man would scarce pitch his wigwam. Sometimes the river swept so smoothly along on its broad bosom, at others it contracted into narrower limits, and hurried on with a quicker current; and as our frail raft was swayed about by the broken water, we oft-times thought either that it would part, or we be swept from its slippery surface, while every now and then our poor horse beat the ice wildly with his hoof, and, as he recognized its unsoundness, his long shrill cries of distress and terror rang far and wide over the river, and quivered through the dismal woods beyond.

Day at length broke upon us, still floating down that lonely river, between its frowning banks, and on our raft, whose limits were now small indeed. Death seemed close upon us in one of its most repulsive forms, and we no longer pretended blindness to his coming, but spoke together as they should whose hour is at hand.

Suddenly the river took an abrupt bend, and, aided by the waters of another river which here fell into it, spread almost to the dimension of a lake; but still it was bordered by those monotonous, wall-like banks, shutting out every hope. At length we sighted something like a chasm dividing the cliff down to the water's edge. I sprang to my feet in a moment. Here was at least a chance of life—the first that during all those wretched hours had presented itself—and I resolved to profit by it.

Without a moment's delay the horse was cast loose from the shafts, and Annie was tied securely to his back, then with a few words of encouragement and hope to the poor young girl, doomed to so many hardships and dangers, I took the halter in my hand, and sending the horse into the water leaped in myself, and then commenced swimming to the shore.

But the struggle was a long and arduous one, for we were more than a mile from the land, and both the horse and I were cramped with cold. Many a time I thought the effort was in vain, and that neither the horse nor I would ever reach the shore, that, to my weariness, seemed to recede as we advanced. Moreover, the current pressed strongly against us, striving to sweep us down beyond our goal, against the steep rocky barrier that lined the water. Fortunately the hot springs had raised the temperature of the water, for poor Annie's girlish form was almost hidden in it, as the waves gurgled around her, sometimes even sweeping above her head. But the young girl's courage rose with the occasion, and she bore unmurmuringly this new phase of suffering.

But they strive hard whose prize is life, and after more than an hour of hope, and doubt and fear, we reached the land we had never hoped to tread again. As we emerged from the water, the wintry wind pierced through our saturated clothing, with an icy chill that threatened to freeze them on us. Providentially, in our need, we found a settler's house near at hand, where we obtained dry clothes, [illegible] of a horse and sleigh, in which we were soon speeding along the road to Tircouaga. As we proceeded, fresh fears for her father's and sister's fate assailed poor Annie, which were only set at rest when she found herself in their arms.

Since then, the chances of a soldier's life have brought me through many adventures, but none have left so deep an impression on my mind as that long and terrible night upon the ice; nor shall I ever cease to remember with deep affection and esteem the young girl who was my gentle and heroic companion in its suffering and danger.

ANDREW MITCHELL.

Agricultural.

Tillage Means Manure.

We have frequently called attention to the fact that the etymological meaning to the word manure is hand labor—from *manus*, hand, and *ouvrer*, to work. To manure the land originally meant to cultivate it, to hoe, to dig, to harrow, or to stir it in any way so as to expose it to the atmosphere, and thus render its latent elements assimilable by plants.

When our first parent was set forth from the Garden of Eden to till the ground from whence he was taken, he probably did not know that the means necessary to kill the "thorns and thistles" enhanced the productiveness of the soil. Yet such was undoubtedly the case.

The farmer for centuries was simply a "tiller of the ground." Guano, though formed, according to the opinion of BOUSSINGAULT, long ages before the creation of man, was not then known. The coprolites lay undisturbed in countless numbers in the lias, the greensand and the Suffolk crag. Superphosphate was not used. Sulphate of ammonia, nitrate of soda, pondrette and fertilizing salts were unknown terms. We can hardly imagine what the agricultural papers of those days, if there were any, could find to talk about. There were no "Frauds in artificial fertilizers" to be exposed; nothing to be said for or against "the mineral manure theory;" the "exhaustion of the soil"—the most fertile subject of modern days—was never thought of. The grateful Earth, fresh from the hands of her Creator, needed only to be tickled with a hoe to make her laugh with a harvest. Nothing was said about oilcake; the nutritive effect of of foods might be considered without any reference to the fertilizing value of the elements derived from their consumption. Nothing was said of underdraining or steam plowing. For many centuries the hoe, the spade and the rake constituted Adam's whole stock in trade.

At length a great discovery was made. A Roman farmer stumbled on a mighty truth. Manuring the land—that is, hoeing and cultivating it—increased its fertility. This was well known—had been known for ages, and acted upon. STRACUVIUS who was undoubtedly a close observer, discovered that the droppings of animals had the same effect! What more natural than to apply the same term to things that produced the same result! But it is to be regretted that, till recently, the original significance of the terms should have been forgotten.

It has long been known that "summer fallows" caused the land to produce greater crops. But the real significance of the fact was not appreciated. Many have decried, and still decry the use of summer fallows. But at length the causes of their beneficial effects are beginning to be understood. Stirring the soil, exposing it to the air, induces important changes and sets free its latent plant-food.

In the *Genesee Farmer* for September, 1861, we called attention to an article in a leading British agricultural journal, headed "Cultivation and Manure as Fertilizing Agents," and remarked that such phraseology would not have been understood a few years ago. We have just read an article in the London *Agricultural Gazette* received this morning, which commences as follows: "A fair autumn well used is worth another guano island to the country. The operations of the last two months upon our stubbles have been as good a guarantee of next year's crops as if the contents of such an island had been spread upon their surface."

It may be that this is a little extravagant. But we can not help feeling a certain degree of pleasure that views which we have long entertained are beginning to receive the sanction of the ablest scientific writers of the day. We hear little now of "soil analyses"—of finding out what particular element is needed, and then dusting it over the land from a snuff-box! Scientific men are turning their attention to the operations of practical agriculture. They are beginning to investigate the causes of practices which the experience of intelligent farmers has proved to be judicious.

That tillage and manure are one and the same thing is a great truth. For some years, too much attention has been given to manure to the exclusion of tillage. Let us not now run to the other extreme, and bestow so much thought on tillage as to forget the importance of manure. Let us cultivate the ground well and make all the manure we can. Both are needed.—*Genesee Farmer.*

☞ The order for drafting 72 men from each battalion of the Militia is, we understand, countermanded for the present.

The Advantages of Crushing Oats.

The London Omnibus Company have lately made a report on feeding horses, which discloses some interesting information, not only to farmers, but to every owner of a horse. As a great number of horses are now used in the army for cavalry, artillery and draft purposes, the facts stated are of great value at the present time. The London Company uses no less than 6,000 horses; 3,000 of this number had for their feed bruised oats, and cut hay and straw, and the other 3,000, got whole oats and hay. The allowance accorded the first was, bruised oats, 16lbs.; cut hay, 7½lbs; cut straw, 2½lbs. The allowance accorded to the second was, unbruised oats 18lbs, uncut hay 13lbs. The bruised oats, cut hay and cut straw amounted to 26lbs.; and the unbruised oats, etc., to 32lbs. The horse which had bruised oats, with cut hay and straw, and consumed 26lbs per day, could do the same work, as well, and was kept in as good condition, as the horse which received 32lbs. per day.—Here was a saving of 6lbs. per day on the feeding of each horse, receiving bruised oats, cut hay and straw. The advantage of bruised oats and cut hay over unbruised oats and uncut hay is estimated at 5c. per day on each horse, amounting to upwards of $300 per day for the company's 6,000 horses.

Foreign & Colonial.

Arrival of the "City of New York."

ST. JOHN'S, N. F. Jan. 23.

The steamship *City of New York*, from Liverpool on Wednesday, the 8th, *via* Queenstown, the 9th, passed Cape Race at 10 o'clock this morning. The dates per the *City of New York* are four days later than those already received.

The steamship *Jura* from Portland also arrived on the 8th. They took the announcement of the adjustment of the *Trent* affair, which was received with the greatest satisfaction.

Consols immediately advanced from 1 a 1¼ per cent.

The U. S. gunboat Tuscarora had arrived at Southampton in watch the *Nashville*, which was there ready for sea.

The vessels destroyed by the *Sumpter* were the ship *Vigilant*, bark *Ellen Dodge*, and the schooner *Arcade*.

There was considerable disappointment expressed in England at the non-reception of definite advices from America, in reference to the Mason and Slidell embroglio; and the greatest anxiety was felt for the news by the next arrival.

The privateer *Sumpter* had arrived at Cadiz where she landed 42 prisoners, taken from merchant vessels which she had destroyed.

QUEENSTOWN, Thursday.

The rendition of Mason and Slidell to the custody of Lord Lyons was received with the greatest satisfaction, but some journals complain of the ungracious manner in which the Washington Cabinet proceeded. Others accord due credit for the act and the graceful manner with which the settlement was conducted.

LIVERPOOL MARKETS.—Breadstuffs generally had a declining tendency, except for corn, which ruled firm and slightly upward. Flour reported dull at 29s a 33s per barrel. Wheat very dull; red Western and Southern, 12s a 13s 6d. Pork unchanged in price and quiet. Lard has a downward tendency Sugar firm. Ashes quiet; pots 36s 6d; pearls 36s.

LONDON, 8th.—Breadstuffs dull and slightly declined. Sugar quiet. Tea steady. Consols closed on Tuesday at 92½ a 92¾ for money.

THE LATEST.

The Paris "Patrie" and "Pays" say that the Washington Government offered to restore Mason and Slidell on conditions that England would not recognize the Southern Confederacy.

The London *Morning Herald* says now the Mason and Slidell affair is settled, England and France have an inducement upon commercial grounds to recognize the well earned independence of the Southern Confederacy, and that unless the step is manfully taken by Ministers at once, it is certain to be taken by Parliament on its assembling.

Additional batteries of artillery were under orders to embark.

The London *Times* shows that by the beginning of February the squadron of Admiral Milne will number seven line of battle ships, 33 frigates, 25 corvettes and sloops of war, and speculates on what he can do therewith.

The shipments of ammunition to the Atlantic squadron continues unabated.

It was rumored that the American Consul would leave on account of the action of Spain.

The British Parliament is summoned to assemble on the 6th of February, but can be called earlier if the exigencies of the case should demand it.

The continental news is unimportant.

The Paris Bourse was firm and higher, rentes being quoted at 67f. 90c.

A violent earthquake had occurred in Greece.

CANTON, 30th.—A *coup d'etat* has taken place at Pekin. The Cabinet have been imprisoned and a new Ministry formed under Prince Kung.

MELBOURNE, Nov. 15th.—The shipments of gold since last mail amounts to one hundred and forty-nine thousand ounces.

American Revolution.

SAN FRANCISCO, Jan. 16.

During the last 50 hours it has rained hard almost incessantly. The storm still continues. Yesterday noon, the water in Sacramento commenced rising again. The third inundation of the city is unavoidable. The area of land now overflowed in the State is twenty miles broad and two hundred and fifty miles long, taking upwards of 300,000,000 acres, mostly arable, a considerable portion being actually fenced and filled. It is estimated that 4,500 sheep and cattle have been drowned since the winter commenced. The unprecedented succession of tremendous storms have washed the mining regions where the ground was previously upturned and dug over, producing great changes rendering probably a great increase in the gold produced from the placer digging for the ensuing season.

CINCINNATI, Jan. 24.

This morning's papers contain full accounts of the battle of Hill Spring. It was a fair, open battle. The rebels fought well, and were only overcome by superior fighting on our side. According to their own account, the rebel force consisted of ten infantry regiments, three batteries, and some cavalry, altogether about 10,000 men.

They fought in bushwhacking style, from ravines and behind trees, bushes and rocks. The brunt of the battle devolved on the 4th Kentucky, 2nd Minnesota, 9th Ohio, and 10th Indiana. For nearly three hours the roar of musketry was kept up.

British Columbia and Vancouver's Island.

THE GOLD MINES.

We have received files of British Columbia papers from Nov. 19th to Dec. 6th.

DELIVERIES OF GOLD.

We find the following notice of the receipt of gold at Victoria:—

ARRIVAL OF THE OTTER.—$300,000 IN GOLD DUST.—The Victoria *Colonist*, of November 19th, says:—

"The Steamer *Otter*, with 125 passengers, and gold dust estimated in the aggregate at $300,000, arrived on Tuesday.—Several of the passengers were heavily laden with the precious metal. One trader had $25,000, and twelve miners from Cariboo possessed sums varying from $9,000 to $12,000 each. The news never was better, although mining has ceased, at Cariboo for the season. The accounts brought by returning miners of their next year's prospects are very exciting, and, of such a nature as to seriously disturb the equilibrium of the most phlegmatic temperament. Even twenty or thirty Chinamen—several of them all the way from Cariboo—speak well of the country; something new for John. One of their number, who has owned a rich claim on the Quesnelle, is reported to have nearly $8,000 in dust, which he dug out during the summer from a place where no one supposed more than living wages were to be obtained. The returning miners are sanguine in their opinion, that no inexperienced person should leave here for the mines before the 1st of next June. The diggings are nearly cleaned out of men. About 200 persons remain to watch the claims, or flume the large creeks. The Lower River towns are full of miners, many of whom intend staying there for the winter.

ARRIVAL OF THE CALEDONIA.—$35,000 IN GOLD DUST.—The Victoria *Press* of November 19th says.—

The steamer *Caledonia*, arrived this afternoon from New Westminsters, with 70 passengers, and about $35,000 in gold dust. A number of men have come down who made big strikes during the last season. One man had a pair of small bags with $10,000 in dust in them, and others appeared to stagger beneath the weight of very small looking bundles of blankets.

ARRIVAL OF THE OTTER—$100,000 IN GOLD DUST.—The *Press* of Nov. 20th says:—

The steamer *Otter* arrived last evening from New Westminster, with one hundred and twenty passengers, and it is said $100,000 in gold dust.

ARRIVAL OF THE OTTER.—$100,000 IN GOLD DUST.—The *Colonist*, of Dec. 1st says:—

The steamer *Otter* arrived late last night from Westminster bringing down about 75 passengers, and 100,000 in gold dust, but as it was mostly in the hands of passengers at the best it is but guess work.

Extraordinary Oil Developements in Enniskillen.

(*Correspondence of Globe*)

SARNIA, Jan. 20.

On Saturday last, I paid a visit to the oil regions of Enniskillen, for the purpose examining personally a well, where oil had been struck on Thursday last.

This well is on the east half of lot 18 in the 2nd con., Enniskillen, on the flats of Black Creek, and owned by a Mr Shaw, of Port Huron, and is the first flowing well yet sunk in Enniskillen, which at all equals the celebrated wells of Pennsylvania.

When the vein was first struck the oil spouted 20 feet above the surface, the full size of the tube six inches square. After being secured with a gas pipe three inches in diameter, with a barrel fastened to the top some 12 feet from the surface, and some large tanks brought from other wells, it was ascertained that one well produced two barrels in one and a half minutes, and has continued to produce at the lowest estimate fifteen hundred barrels every 24 hours, without any apparent diminution. The oil is without any mixture of water, and about 40 or 41 specific gravity, which is considered of much more value than the light oils of Pennsylvania, having more burning oil and less naptha. Of course most of the oil is wasting, as it is impossible to get barrels or tanks sufficient to hold it.

Whether they will be able to control it so as to confine the oil in the well is yet to be tested. The owner is afraid of injuring the well by stopping the flow. There are about 300 barrels a day leaving on the Great Western cars, and if there were a demand a 1000 barrels per day could be delivered.

I am, Sir,
Yours, &c.,
THOS. FORSYTH.

P. S.—I forgot to mention that that the well is 156 feet deep in the rock, which is important, as such wells are from 100 to 800 feet deep in Pennsylvania.

The Newmarket Era.

Newmarket, Friday Jan'y 30th, 1862.

General Summary.

☞ We are indebted to Dr. J. J. Hayes for late Chicago and other Western U. S. papers—containing full particulars of the war.

☞ According to a resolution adopted at the last meeting of Holland Landing Council, the regular meetings of the Corporation Board will take place on the first Saturday in every month, at the hour of 2 p. m.; hence, there will be a session to-morrow.

☞ A new song, entitled "God Save the Queen," as sung by the Juvenile Choir in the Congregational Church at their recent Sabbath School Demonstration, will appear next week. It got mislaid or it would have appeared to-day.

☞ In our report of the King Township Agricultural Society annual meeting, last week, we omitted to mention that the Society offers $15, to be divided into three prizes, and to be awarded to the three Directors' Assistants procuring the largest number of membership for the current year.

☞ The recent fire in the Parliament House and New City Gaol, Toronto, are supposed to be the work of parties connected with the notorious Brooks Bush Gang.—Several burglaries have also occurred, within the past two weeks—causing no little excitement among the citizens.

☞ We understand our townsman Mr. Thos. Nixon has entered into partnership with Mr. W. A. Clark of Clarksburg, formerly of this place, and is about to remove thither, to engage in the mercantile and manufacturing business. Success to the Northern Woolen Mills, say we.

☞ The Local Superintendent of Schools, Mr. Thos. Nixon, delivered a most admirable lecture on Tuesday evening last, in the Hall, on the subject of Education. Although the night was stormy, the attendance was large and respectable. We shall publish the lecture next week.

☞ Curry, the inimitable, who delighted a select audience in the Mechanics' Hall a short time since, will give one more of his popular entertainments in the Hall this (Friday,) evening. His "comic looking glass," in which he presents a variety of characters, always call forth the feelings of his audience in thunders of applause.—The way he takes down aspirants to positions in society which by nature or education, they are not qualified to fill, is worth the price of admission to witness.

To Correspondents—We have received another letter from "A Subscriber to the Fund;" but as the object sought for has been attained, we do not think any real good can be accomplished by prolonging the discussion.

M. J. Stouffville—we have no recollection with regard to the prizes referred to, but will make an examination with the view to understand the facts connected with it.

☞ The member for North York has our thanks for a copy of a new work entitled "Biographies of Eminent Canadians." As a book of reference, it will be found valuable in every library. Mr. Willson visited this constituency on Wednesday last—the same evening he lectured before the Mechanics' Institute at Brownsville. He purposes visiting all the Townships on the House moves.

☞ The Committee appointed to collect subscriptions in aid of the sufferers by the recent fire in Newmarket, desires us to say, it will save much trouble and enable them to complete the duties assigned them, if the parties subscribing thereto would call and pay the same at once, to Mr. Joseph Millard, with whom the list may be found,—or to Mr. R. Robinson, or Mr. James Allan. During the present inclement season, if any real practical good is to be the result of their generous benevolence, now is the time to use the means subscribed.

The Speakership and the New House.

The Montreal *Pilot* and Lower Canada organ of the Government announces that Parliament will assemble before the end of February, for the despatch of business, and speculates at some length on the question of Speakership—but concludes by saying "all is as yet uncertain." Messrs. Langevin, Turcotte, Sicotte, Drummond, Loranger, Starrow and Rose, have each been named; but we believe neither the Government nor Her Majesty's Loyal Opposition have made a choice, or even intimated whom they will support as a party. We should not be surprised, however, to hear of Mr. Langevin being the Government candidate and Mr. Sicotte that of the Opposition. The latter has occupied the position of Speaker—having been chosen at the meeting of the new Parliament after the election in 1854, in opposition to Mr. Papineau, the then Government candidate, Mr. Hincks being Premier—and having been proposed by Mr Dorion, seconded by the late lamented Mr. Joseph Hartman, then representative of North York. If Mr. Sicotte could now be as successful as then, we should rejoice at his nomination.

The Hamilton *Spectator* gives currency to the rumor that Hon. Mr. Rose will be the nominee of the Ministry; but under the circumstances, and as has been very properly remarked by the *Pilot*, we think this rumor extremely doubtful. In fact, in view of his abrupt resignation of the Commissionership of Public Works, and of the grave charges against him in the management of the Government Works at Ottawa, and connected with the expenditures during the visit of the Prince of Wales, it is not at all likely he would accept the position if offered. Explanations will be required, which, as Speaker, it would be difficult for him to make,—and charges will be brought which he may find it troublesome to meet under the circumstances.

There is also a good deal of speculation with regard to the relative strength of parties in the new House; but we think it difficult to arrive at anything like certain data until after they take their places or vote on the question of Speakership. We do not believe, however, the Ministry to be either numerically or relatively so strong as in the last Parliament; and if the Opposition succeed in getting four or five really competent men on the Finance Committee, so as to thoroughly expose the manner in which the public funds of the country have been squandered,—and show that a large deficit of between three and four millions has occurred during reign of Galt & Co., we have no hesitancy in predicting their speedy overthrow—a consummation devoutly to be desired.

Dr. Warren's Household Physician.

The above is a new medical work, specially adapted for the use of Families, Planters, Seamen and Travellers. All the various diseases of men, women and children are described in plain language with the newest and most improved method of treating them. It is illustrated by thirty-six figures on splendidly colored lithograph plates, and over two hundred engravings. Published at Boston by Bradley, Dayton & Co., —Toronto, by Rollo & Adam, King Street. Mr. C. Brown is the travelling agent for this section of country, and is now making a tour soliciting subscribers. From the numerous testimonials he bears, in favor of the work, we have no hesitation in recommending it to an enquiring public. In speaking of it, the *Christian Guardian* says:—

"Perhaps there is no kind of book so much needed in a family as a good and complete work on the cure of disease, written in plain language, and prescribing safe remedies—giving all the information necessary to an intelligent treatment. Dr. Warren is an eminent physician of Boston, and he has here given us a work which seems to contain all that is desirable in a volume of the kind."

Again, after stating how many pages of the work is devoted to the Progress of Medicine, Anatomy, Hygiene, Surgical Diseases and Treatment, and explaining the theory and practice of Homœopathy and Hydropathy, the *Guardian* further says: "What we like in the work is its completeness—comprehending all that a person can desire in a book of Domestic Medicine. Its compression of matter containing no useless talk, but being filled, literally crammed, with interesting truths and facts; and its clearness, distinctness, and definiteness in its descriptions and directions. The work is most warmly recommended by some of the first physicians in the United States.—Dr. Warren makes very little use of Mercury, believing that there are substitutes for it, which are not liable to the same objections. Almost any disease known in America will be found in this volume; and the different kinds of medicine, and the mode of their preparation, is especially useful and apparently completely reliable." There are 36 pages devoted to Cookery and Nursing for the sick room. Price $5.

Midland Division.

The forthcoming Upper House Election is beginning to call forth a good deal of speculation with regard to the "coming man." At present we understand the Ministerial party in the Division have three candidates before them—Hon. Wm. Robinson, Capt. Armstrong, and the Reeve of Newmarket, Dr. Pyne.

The Reformers, in order to settle upon a Candidate, are pursuing the usual course of holding a Convention of properly chosen Delegates from the respective Municipalities in the Division. It meets at Bradford on the 18th proximo.

At a meeting of the Reform Committee, held in Newmarket, on Saturday last, the number of Delegates to be elected from each Corporation in North York, was decided as follows:—

King	10
Whitchurch	7
East Gwillimbury	5
North Gwillimbury	2
Georgina	2
Newmarket	2
Holland Landing	1
Total	29

South Simcoe will elect an equal number,—the Convention, consequently, will consist of fifty-eight Delegates. The meetings in the respective Municipalities are all to be held on one day—Saturday, Feb'y 15, 1862, at the hour of 2 o'clock p.m.,—certified returns of the Delegates elected, to be forwarded to the Secretary of the Reform Committee, Mr. Jackson, by the following Monday evening, if possible.

An important duty now devolves upon the party to select men of judgment and discretion—men whose influence and position will give weight to the decision of the Convention—men who will not be governed by expediency but who will act from principle. Upon the result of their decision, depends, to a very great extent, the success of the party, we have every reason to anticipate will be triumphant. And to the electors of the Division we would say, make no pledges until after the forthcoming Convention. Wait until you see who the respective candidates are likely to be; and above all, be wary of the men who claim your suffrages as Reformers, but whose Ministerial proclivities hitherto have been unmistakable. Men who profess all things to all men, make unsound politicians—poor legislators, and time-serving, office-hunting representatives—make, in fact, just the class of men who have for years sold the party to Lower Canadian domination—denied the just demands of equal representation—and sustained men at the head of the government who have reduced the country to the verge of bankruptcy, by their profligate expenditures and gross mismanagement. And when we recollect that the man elected is to sustain the position of representative for eight years, it becomes us to exercise great prudence and caution in making the selection. Several gentlemen are spoken of, both in and out of the Division; but we forbear mentioning names, as their respective claims and merits will be tested before the Convention, and believing that a wise and judicious choice will be made.

Newmarket Council.

A regular meeting of the above Council took place on Monday evening last. We were unable to be present in consequence of indisposition; but have learned since, that Mr. Ed. P. Irwin was appointed Clerk, to supply the place of Mr Thos. Nixon, who is about removing from Newmarket. With this appointment, personally, we have not the slightest objection. So far as we know, when occupying that position before, Mr. Irwin was kind and courteous; but we believe the people generally would have been better pleased had some one residing on Main Street been chosen, as a matter of convenience.

The Council also appointed Mr. Eli G. Irwin as Assessor—a qualified man, we should think; but how the Reeve and Mr. Wallis have been induced to "swallow the pill and chew their leek," we do not pretend to understand. These two men, a couple of years ago, were going to turn Newmarket upside down, on account of what they stated was the wilful and perverse assessment of Mr. Irwin and Mr. Bogart; but this appointment now made, vindicates the course pursued by the Assessors, and evidences to the public that the patriotism of the two councillors above alluded to, was a harmless "bit of brag," and has now gently cooled to zero. The Millenium draws on space.

We would suggest, in making the remainder of the appointments to office—that instead of one, we have two or three Pound keepers; and instead of three, we have six fence viewers. The village will be better accommodated, and less fault will be found.

Missionary Meeting.

The annual Missionary Meeting in connection with the Wesleyan M. Church of this place took place in the Chapel, Prospect Street, on the 25th inst. Mr. E. Jackson occupied the chair,—and on the platform were Rev. Mr. Creighton, Chairman of the Barrie District; Rev. Mr. Clark of Cookstown; Rev. Mr. Brooking formerly Missionary to Africa and now Indian Missionary in Canada, and Rev. Mr. Meacham of Newmarket—all of whom addressed the meeting, and advocated the claims of the society in a clear and forcible manner.

Miss Moulton presided at the melodeon, and the choir added much to the interest of the occasion by the performance of a choice selection of appropriate anthems and hymns. In fact, we think they never did better,—and the applause from the audience, after each piece, gave unmistakable proofs of appreciation.

At the conclusion of the meeting a collection was taken up in aid of the funds of the Society, amounting to about double of last year. Everything passed off harmoniously, and many said it was the best Missionary meeting held for years. After proposing a vote of thanks to the Chair, and also to the Lady Collectors of last year,—Mrs. Cook and Miss Moulton were appointed Collectors for the ensuing year. A vote of thanks was then tendered the chairman, and the proceedings terminated by the Rev. Mr. Creighton pronouncing the benediction.

York and Simcoe S. S. Convention.

We would again remind the friends of Sabbath Schools in these Counties of the approaching Convention to be held at Aurora on the 11th and 12th proximo. Every School within the bounds of the Association, subscribing to the platform of principles laid down as the basis of the first Convention, should see to it that returns are forwarded to the Secretary by the time stated, together with the names of the gentlemen appointed as delegates. Those schools not already furnished with blank returns, should write the Secretary of the local committee Mr. J. W. Dissett, of Bradford, who will have pleasure in forwarding them to any as are not already supplied. We hope every true friend of the cause will put forth an effort to make the coming Convention worthy of the Counties and worthy of the noble objects in view. For particulars, see advertisement in another column, or write the Secretary at Bradford and obtain printed programmes. As the objects of the Association are purely of a benevolent character, we trust all the other local papers throughout the Counties will second the efforts of the Committee to make the coming annual gathering a decided success.

Whitchurch Ag. Society.

We publish to-day, for the benefit of our agricultural readers, the Report of the Judges of the Whitchurch Agricultural Society on the Root crop of 1861.—The Gentlemen concerned have taken much pains in the matter, and the result of their labor has furnished the community with a valuable mass of statistics; in fact it is only by thus submitting the means made use of to produce a particular crop to a critical analysis, that we can gain a correct knowledge of the true way to raise the most profitable crop at the least expense. We believe that this system is extensively adopted in other sections of the country with great advantage. For instance, the County Society might offer certain prizes each year for the best crop of certain cereals off a certain average—it being made a condition that the competitors keep an exact record, for the use of the judges, of both the ordinary and the special circumstances connected with each crop.

Holland Landing Council.

Holland Landing, Jan. 21st.

The members elect of the new Council met at Henry Croxon's Hotel, on Monday the 20th, at noon. Each member consisting of Messrs. McLeod, Wilson, McClure, Bacon, and Lane, made a declaration of qualification, and a declaration of office.

R. T. Wilson, Esq., was then chosen Reeve, and after making the declaration of office, took his seat.

The Council adjourned for a few minutes, and then resumed its sitting.

Moved by J. McClure, seconded by W. McLeod, That Arthur McMaster be one of the auditors, to audit the accounts of 1861.—Carried.

The Reeve nominated Joshua Chapman, who was appointed the other auditor.

Mr. McClure presented a By-law to appoint Municipal officers for 1862, and after passing through its various stages, the By-law was passed.

OFFICERS.

Village Inspector—J. Sheppard.
Assessors—Jas. B. Evans, and Henry Croxon.
Pound-keepers—J. Chapman and L. Dale.
Fence-viewers—Donald Beaton, John Guinan, Jas. B. Evans, David Elerby, and George Pulford.

Moved by Mr. McClure, seconded by Wm. McLeod, That when this Council adjourns it do stand adjourned till the first Saturday in February, and that the monthly meeting be on the first Saturday in every month, and at the hour of 2 o'clock, p. m.—Carried.

On motion the Council adjourned.

J. Kennedy, *Clerk*.

Correspondence.

☞ We wish to be distinctly understood that we are not responsible for the opinions of our Correspondents.

To the Editor of the Newmarket Era.

Sir,—In your issue of the 24th instant, I find some would-be champion of William Thompson, styling himself "A Real Subscriber," has the effrontery to harrass and annoy my feelings by alluding to the unfortunate affair by which I have been deprived of the sight of my right eye. "Real Subscriber," in my opinion, had better keep his money in his pocket, than give the public a treat of his grammar and beautiful diction, by giving them to understand that there were parties residing in Newmarket willing to subscribe money to uphold his conduct. As to provocation on my part towards Mr. Thompson, the day of the unfortunate occurrence, I most distinctly wish it to be understood by "Real Subscriber," and others that I offered none. Had Mr. Thompson left my shop when politely requested, the sad affair which gold cannot compensate, would not have occurred. As to the action being litigious, vexatious, or unnecessary, the award of the Jury proves quite to the contrary.

I remain, your obed't servant,
James Nixon.

Newmarket, [illegible] 1862.

Ladies' Aid Society.

To the Editor of the Newmarket Era.

Sir,—You will confer a favor on the Ladies' Aid Society, by calling the attention of those interested in the cause of suffering humanity, to the following notice:—

That the Ladies of the Benevolent Society would be very thankful for any cast-off clothing those interested in relieving the sufferings of the distressed may feel disposed to give. The means at the disposal of the Society are quite inadequate to the demands made upon it. Any one disposed to help in this way, can do so by sending the articles to the Society's Rooms, in Mr. Caldwell's Shop, on Wednesday afternoon, or to Mr. McCracken's, at any other convenient time.

By order of the Committee,
H. P. McCracken,
Newmarket, Jan. 23rd, 1862. *Sec.*

Foreign & Colonial.

Arrival of the Europa.

Halifax, Jan. 26.

The steamship *Europa* from Liverpool on the 11th at 2 p. m., and Queenstown on the 12, arrived at 10.30 last night. The *Europa* has 16 passengers and £6,500 for Boston, and £6,400 for Halifax. The wind was then and is still blowing a hurricane with a heavy sea. The Europe has neither troops nor stores, the Government having discontinued shipments by the Cunarders.

It was reported that notwithstanding the pacific solution of the American question, warlike preparations at Woolwich have not been relaxed.

The Sparta and Ajax continued to take on heavy stores for Halifax.

No official notice have yet been given at Portsmouth suspending any discharge of hired mechanics or laborers, but it was understood that the reduction takes place in April.

A Cabinet Council was summoned for the 14th, but had been countermanded.—Mr. Seward's dispatch having been considered in a Council held on the 9th.

The *Times* understands that the newer will be returned, expressing gratification at the disavowal of Capt. Wilkes' act, accepting the satisfaction rendered, and assuming that the precedent in the Trent case will suit the case of the schooner Eugenie Smith. As to the general discussion of the law of nations the Government will decline any answer until they have had an opportunity of submitting the whole note to their law officers. There are propositions in this note which are not at all admissable, and after the delivery of the prisoners these points may be properly raised and discussed.

The *Morning Post* announces that a thorough understanding had been arrived at with the American Government. Not only had they given the required reparation, but in doing so, Mr. Seward will have succeeded in impressing on the English government the notion that they have not only present indemnity, but also no small pledge of future security.

The *Times* says that rumor fixes England's expenses, owing to the late difficulty, at £2,000,000; but the *Times* expects when all the bills are in it will be double that sum, and that the money has not been thrown away.

The *Daily News* is eulogistic of the course pursued by the Washington Government, and bitterly denounces the policy of the *Times* and *Post*.

The *Times* has a strong edition on the reception due to Mason and Slidell, and says they are about the most worthless booty it would be possible to extract from the jaws of the American lion, having been long known as habitual haters and revilers of England. The *Times* seriously hopes that the English people will not give these fellows anything in the shape of an ovation. The civility to a foe in distress is all they can claim. England has returned them good for evil, and even now, if they can they will be only too willing to entangle her in a war with the North. England would have done just as much to rescue two negroes. Let Mason and Slidell, therefore pass quietly on their way and have their say with any one who may listen to them.

RUSSIA.

It is said that Russia had sent an embarrassing ultimatum to Rome, to the effect that if the Pope does not condemn the conduct of the Polish clergy, Russia will recognize the Kingdom of Italy.

TURKEY.

The Turks at Tripoli have maltreated the Christian inhabitants. The French consul demanded indemnity, and a French frigate had arrived off the port.

INDIA AND CHINA.

Additional Telegrams had been received in anticipation of the arrival of these mails. After the coup d'etat at Pekin, a new regency was established under the two Empresses. The state of the affairs was encouraging. The rebels were in the vicinity of Shanghai, and the foreigners were preparing for an attack.

Ning Poo was also in a state of alarm from the same cause.

At New Zealand affairs looked peaceful. Sir George Grey had accepted the invitation of the natives for a conference.

LATEST via QUEENSTOWN.

January 12.

The *Journal of St. Petersburg* publishes an article congratulating Mr. Seward on the uprightness and intelligence of his policy, and demanding that the Trent incident may become the starting point of negotiations for the recognition, by the Powers, of common principles upon the question of the neutral flag. It also expects England to give the world solemn guarantees for the future, by signing a convention, which, by ensuring universal respect for the rights of neutral powers, would contribute to the maintenance of peace, and mark the progress of civilization.

Turin, Jan. 12.

In reply to a motion made by Signor Chiapusy, in the Chamber of Deputies, for explanations relative to the late events at Castle Mare, Baron Ricasoli stated that according to the despatches received by the government, almost all the leaders of the movement had been arrested and order restored.

Paris, Jan. 12.

A decree by the Emperor appoints Marshal Magnou Grand Master of the Freemasons in France. The Grand Master has hitherto been elected by the Freemasons themselves.

Another decree regulates the taxation of foreign bonds and shares.

Liverpool, Jan. 11.

Breadstuffs Market.—Wakefield, Nash & Co. and others report flour heavy and dull at 6d lower. American quoted at 28 to 32s. Wheat dull and declined at 3d to 4d; red Western at 11s 3d to 12s 2d; red Southern 12s 3d to 12s 6d; white Western and Southern 12s 5d to 13s 3d. Corn heavy and 1s to 1s 6d lower; mixed 31s to 31s 6d; white 34s to 37s. The same authorities report beef quiet and easier. Pork tending downward. Bacon declining, 40s to 43s. Lard inactive and 1s to 2s lower. Tallow dull at 1s lower.

Counties' Council.

(From the Globe.)

The first meeting of the Council for the United Counties of York and Peel took place yesterday in the Council Chamber, Court House, Adelaide Street. The Clerk, (J. Elliott, Esq.,) took the chair and called the Council to order. He then called over the roll, when the following Reeves and Deputy Reeves answered to their names:—

Albion.—Wm. Hanna, R.; J. Vance, D. R.
Chinguacousy.—M. Perdue, R.; R. A. Hartley, D.R.
Caledon.—W. H. Walker, R.; Richard Allen, D. R.
Etobicoke.—E. Masson, R.; W. A. Walker, D. R.
Georgina.—Angus Ego, R.
North Gwillimbury.—John Morton, R.
East Gwillimbury.—Jas. Parnham, R.; Geo. Holborn, D. R.
Gore of Toronto.—Thos. Graham, R.
King.—J. P. Wells, R.; Albert Webb, D. R.
Markham.—W. B. Button, R.; Arch. Barker, D. R.
Scarboro'.—J. P. Wheeler, R.; John Crawford, D. R.
Toronto Tp.—Melville Parker, R.; George Blain, D. R.
Vaughan.—R. J. Arnold, R.; Alfred Jeffrey, D. R.
Whitchurch.—John Ironsides, R.; Edward Wheeler, D. R.
York.—W. Tyrrell, R.; R. Bell, D.R.
Newmarket.—Dr. Thomas Pyne, R.
Yorkville.—Wm. Rowell, R.
Holland Landing.—R. T. Wilson, R.
Streetsville.—S. J. Barnhart, R.
Brampton.—W. Hughes, R.

There were no absentees.

Election of Warden.

The Clerk then said that the next business before the Council was the election of a Warden for the current year. He would put the names to the Council in the order they were presented to him, and he would now call upon any member of the Council to nominate a gentleman for Warden.

Mr. Tyrrell proposed J. P. Wheeler, Esq., of Scarboro', (the late Warden) as Warden for the United Counties for the current year.

Mr. Wells seconded the nomination.

Mr. Graham moved, and Mr. Hartley seconded that Angus Ego, Esq., of Georgina, be Warden for the current year.

The Clerk, after waiting a reasonable time and no other name being proposed, took the vote on Mr. Tyrrell's motion with the following result:—

Yeas.—Messrs. Tyrrell, Bell, Masson, Wallace, Parnham, Holborn, Crawford, Blain, Morton, Dr. Pyne, Rowell, Webb, Wells, Barnhart, Wheeler, (Whitchurch,) Ironsides, Barker, Walker, Jeffrey and Arnold—20.

Nays.—Messrs. Hanna, Vance, Parker, Ego, Hughes, Wilson, Graham, Hartley, Perdue, Button and Allen.—11.

The Clerk then declared John P. Wheeler duly elected Warden of the United Counties for the current year; and that gentleman was led to the chair by his mover and seconder.

The Warden rose and said he desired to return his sincere thanks to the Council for again electing him to the office of Warden of these United Counties. He assured him that they had not lost confidence in him during the year he had occupied the chair. He trusted that he would be so enabled to discharge the duties of Warden during the ensuing year, that they would find that their confidence had not been misplaced. He was happy to inform the Council that the finances of the counties were in a very prosperous condition. In fact, he might say, they had never been in a more prosperous condition. Relative to the amount of the award of the arbitrators against the city of Toronto, amounting to $12,351, he was happy to inform the Council that the whole amount, with the exception of $331, had been paid into the hands of the Treasurer of these Counties, and he expected that the remainder would be paid in this very day. It was expected sometime ago that the city prisoners would be removed from the County gaol during spring, but the late calamitous fire in the new gaol has prevented this, and the removal would not take place till sometime in spring or summer. When this did take place they would require to make considerable alteration in the present building for the proper classification of prisoners. A short time ago he (the Warden) had had an interview with the Chairman of the Commissioners of Prisons, and he had been informed that it would be necessary to make the alterations at once. He (the Warden) represented to him that the alterations might be better made after the city prisoners had been removed, and the Chairman upon this representation, allowed the matter to stand over. These alterations would be necessary, and would require to be done, but he trusted that they would be made without any extra taxation to the counties. By the good judgment of the Council, the taxation of the counties had been kept down, and the expenditure had been kept within the revenue or income of the counties. He was very sorry however to say, that there were other municipalities who had run recklessly into debt, and an attempt was now being made to saddle their indebtedness on the whole Province; but he trusted that this Council, and every other honest Council before they adjourned, would take such steps as would prevent the passage through the Legislature of such a monstrous measure.

WHITCHURCH TOWNSHIP AGRICULTURAL SOCIETY.

Judges' Report of Root Crop for 1861.

NAME OF COMPETITOR	Name of Crop Judged.	Kind of Soil.	Was it Fall Ploughed and How Often?	When was the Land Manured?	What kind of Manure was Used?	What number of Loads per Acre? Before proceeding to business it would be necessary for him to subscribe the oath of office. He trusted that the utmost harmony would prevail among them, and he would look to them for assistance to enable him to discharge the duties of his office during the present year. He would again thank them for electing him to fill the office of Warden of these United Counties. (Applause.)

The Warden having subscribed the necessary declaration.

Mr. Musson moved that a Committee of seven members be appointed to strike the Standing Committees for the year.—Carried.

The following committee were elected by ballot to strike the Standing Committees—Messrs. Wells, Tyrrell, Perdue, Musson, Ironside, Ego and Button.

The Council then adjourned till ten o'clock this morning.

January 29.

The Counties' Council met yesterday forenoon at ten o'clock. The Warden in the chair.

Mr. Tyrrell brought up the report of the Select Committee appointed to nominate the standing committees for the current year, as follows:—

Finance and Assessment.—Messrs. Musson, Tyrrell, Crawford, Barker, and Hughes.

Education.—Messrs. Barnhart, Tyrrell, Burnham, Wells, and Pyne.

County Property.—Messrs. Button, Hartley, Ironside, and Wheeler.

Equalization of Assessment.—Messrs. Ego, Crawford, Rowell, Wallis, and Perdue.

Roads and Bridges.—Messrs. Parker, Harman, Walker, Wilson, and Holborn.

Printing.—Messrs. Graham, Arnold, Blain, Vared, and Webb.

Contingencies.—Messrs. Musson, Jeffrey, Button, Allen, and Morton.

The report was adopted.

The Council then adjourned till this morning at ten o'clock.

The Conquest of Canada by the States

Whilst the New York press is bullying and belittling Canada by turns, the Boston Traveller goes straight to mark. Hear it on the probable result of an attempt on the part of the North to conquer Canada:

"We might conquer Canada, but that is by no means to be depended upon, and if we judge by the events of history, we ought not to take a Canadian conquest into the account at all. We have repeatedly failed in attempts on that country, and we see no reason for supposing that we should be more successful there now than we were in former days. We have not better commanders and better soldiers than we had in 1775 and 1812, and we broke down utterly in those years. We are much stronger than we were, but the capacity of Canada to resist us has increased as much as our capacity to attack her.—We should not delude ourselves with wild talk about foreign conquest at a time when we cannot drive a domestic army from the Vicinity of Washington, when our national capital is virtually besieged by land and blockaded by water. If, instead of wasting precious time, every sand in the glass of which was of gold, we had done something to impress foreigners with a sense of our capacity to fight, we should not have been threatened even by England; but our forbearance, our timidity, our fear to strike lest the Union should be endangered, have caused the English to believe that we can be dealt with at no great hazards."

True, every word!

☞ During the past summer the Baptists of Ottawa have erected a handsome Church on Queen street.

FIGURES.—Large men are less quarrelsome than little ones. The largest of all oceans is Pacific.

FACT.—Tennyson says that every sea is full of life. He should have excepted the Dead Sea.

☞ Dr. Russel, of the London *Times*, has determined to return to England. He has engaged passage in the Cunard steamer Arabia.

☞ Government has just discovered that large quantities of cotton are now being carried through Texas into Mexico and thence to England and France.

☞ It is asserted that the money spent by the British Government in sending out troops to Canada would have been sufficient to have re-laid the Atlantic Cable, or reconstructed the Quebec and Halifax Railroad.

☞ The *Great Eastern* steamship has been engaged by the Government to be made available, with all possible despatch for the purpose of conveying troops to Canada, and it is highly probable that Bristol will be the port selected for her departure.

☞ The Bishop of Huron, on Monday last, says the Gall *Reporter*, cancelled the debt he held against St. Paul's Cathedral, in the city of London, to the amount of $3 570, and also the interest amounting to $200. He also made a present to the Church of £1,000.

☞ Two Hundred British vessels lying at New York displayed their colors half mast high upon receipt of the news of the death of Prince Albert. Other vessels belonging to various nations also joined in the symbol of grief.

Mr. S. A. Irons, hotel keeper, King ston, has failed for a serious amount, his liabilities being so far made up to 69,000 and this failure will be, it is said, productive of much injury, for the loss is distributed amongst a large number of persons of limited means, to some of whom it will be almost utter ruin.

AFFECTING INCIDENT.—It is stated on authority that previous to the closing of the coffin which contains the mortal remains of the lamented Prince Consort, a wreath of flowers affectionately made by the Princess Alice, and a miniature portrait of the Queen, were placed beside the corpse.

BISHOP OF KILLALOE'S DEATH.—The Dublin *Evening Mail* announces the death of Lord Riversdale the aged Bishop of Killaloe, who has been in a dangerous state of health for some time. He was born in 1784, consecrated Bishop of Killaloe in 1830, and succeeded his brother William as third Baron Riversdale, in 1848.

ST. JOHN, N. F., 24.

The steamer *Mauritius*, from Liverpool on the 1st inst. for Halifax, with 750 troops on board, put in here this morning short of coal. She reports that she experienced fearful weather, and had to throw 30 horses overboard.

☞ A short sack or jacket, made of seal skin, double breasted, and with large square pockets capable of holding the hands, is the fashionable skating garment of the season for young ladies, and is called the "Zou Zou." It is ornamented with large polished patent buttons, and decidedly the "sensation" style of the season in New York city.

☞ A fire occurred in Ottawa, on Tuesday last, in the Market Hall, which was entirely consumed. The library of the French Institute was within the building and was partially destroyed. It was insured for £300 in the Western Insurance Company. The building belonged to the Corporation, who had it insured in the Montreal Insurance Company for £350 Several presents from the Emperor of the French to the institute were slightly injured.

TORONTO MARKETS.

THURSDAY, Jan 30.

There was a large supply of grain on our market yesterday, the receipts altogether would exceed 5,000 bushels—there is considerable activity among dealers. Fall Wheat to the extent of 3,000 bushels sold at prices ranging from 90c a $1 07. Spring Wheat is in demand; about 2,000 bushels sold at 82c a 85c per bushel. The Great Female Medicine.

The functional irregularities peculiar to the weaker sex, are invariably corrected without pain or inconvenience by the use of Judson's Mountain Herb Pills. They are the safest and surest medicine for all the diseases incidental to females of all ages, and more especially so in this climate.

Ladies who wish to enjoy health should have these Pills. No one who ever uses them once will allow herself to be without them. They remove all obstructions, purify the blood and give to the skin that beautiful, clear and healthful look so greatly admired in a beautiful and healthy woman. At certain periods these Pills are an indispensable companion. From one to four should be taken each day, until relief is obtained. A few doses, occasionally, will keep the system so healthy, and the blood so pure, that diseases cannot enter the body.

Judson's Mountain Herb Pills are sold by all Dealers in Medicines.

Died.

In Whitchurch, on the 26th inst., Mrs. SARAH CASE,—relict of the late Mr. George Case: aged 76 years.

Counties of York and Simcoe.

PURSUANT to adjournment, the Union Sabbath S. Convention for the Counties of York and Simcoe will be held on

TUESDAY & WEDNESDAY,

FEBRUARY 11th, and 12th, 1862, in the

W. Methodist Church, Aurora,

Ministers of the Gospel and Delegates from the various Sabbath Schools—Union and Denominational—in these Counties, who can agree to the doctrines forming the basis of Union laid down at the Kingston Convention, are hereby invited to attend.

Morning Session to commence in the Wesleyan M. Church, at 10 o'clock of Tuesday, and 9 o'clock on Wednesday.

Public Meetings will be held each evening in different Churches. Exercises to commence at 7 o'clock. A Collection will be taken up at the close of each meeting, to aid in defraying the expenses of the Convention.

Each Sabbath School in the above-named Counties is requested to send one or two Delegates, and forward their names, with the name of the school they represent, and the answer to the accompanying statistical questions, as soon as practicable, to *Mr. J. W. Dissett, Bradford.*

The Christian inhabitants of Aurora having kindly offered to entertain the Delegates to the Convention, a Local Committee will be in attendance in the Church, on the days of meeting to receive Delegates and appoint them places of abode during their visit.

Arrangements are now being made to allow, if possible, Delegates to pass over the Northern R. Road at one fare.

The great success hitherto attending the Convention, by exciting a deeper interest in the Sabbath School cause, and by uniting the counsel and experience of those actively and successfully engaged in the work, gives encouragement to the Committee to hope that the proposed Convention of the Teachers of York and Simcoe will be eminently useful.

All Ministers of the Gospel are particularly requested to bring the subject before the schools in connection with the congregation to which they minister, and to attend themselves, whether Delegates or not, and take part in all the proceedings.

By order of the Executive Committee.

ROBERT BOYD, Chairman.
J. W. DISSETT, Secretary.

January 8th, 1862. tf-48

Important Auction Sale

OF VALUABLE

REAL ESTATE,

IN THE COUNTY OF YORK, BELONGING TO

Lackie & James.

THE undersigned are instructed to sell by Public Auction, on the

4th Feb. next, at Graham's Hotel, Aurora, at Noon,

The following Valuable Property, being composed of a part of the East half of Lot No. 81, in the 1st Concession of Whitchurch, containing

EIGHTY ACRES,

More or less, and situated a few rods from the Aurora Station, on the Northern Railway, and also fronting on one of the leading roads to the Station and village. There is a never failing stream running across the above premises, which affords water power sufficient to drive the Newmarket Mills. There is also a very fine large School House on one corner of the lot, and a Church at the other corner; a House, Barn, Shed, and other necessary buildings on the above property. It is composed of a rich clay soil, and surrounded by a beautiful rich farming community; has *SIXTY-FIVE* acres under good state of cultivation, and the balance good Pasture and Timber Land. There will also be offered at the same time and place, for sale,

Four Village Lots,

Quarter Acre each, on Wellington-street, commanding a beautiful view of the Station, and would be well adapted for private residences

Also,

One Two-Acre Park Lot,

On Park-street; one 2-Acre Timbered Lot on Centre-street, two 3 Acre Lots Half-timbered, on Park-street. The above park lots are beautifully situated, besides very valuable, on account of the timber on them, which can be chopped into cordwood and sold to the Northern R. R. Co., at a high price. The above property has many other advantages, which make it a very desirable location, among the most prominent are its being situated immediately outside of the proposed corporation line, which will free it from a heavy taxation, and at the same time be equal in value to property inside of the corporation; and also near one of the most flourishing and beautiful villages in the country, admired and noticed by every traveller passing through it, for beauty and the beautiful scenery surrounding it. Aurora is a village of about 1,900 inhabitants, and has its schools, mills, foundries, and all the advantages necessary to make it a very pleasant and desirable place to retire from the busy turmoil of a city life.

Title Indisputable.

Terms of Sale.—$200 down, 10 per cent of the purchase money on day of sale, balance of first instalment to be paid in twenty days after day of sale, when the writings will be executed; the balance in five years, secured by mortgage. Ten per cent on day of sale, on lots and in addition, 15 per cent more on purchase money in twenty days after day of sale, when the writings will be executed as above, and the balance in four equal annual instalments, secured by mortgage.

ASHTON & MACHELL,

Auctioneers.

Winchester's HYPOPHOSPHITES.

(Dr. Churchill's Specific Remedy.)

FOR CONSUMPTION,

Nervous Debility, Scrofula, Dyspepsia, Bronchitis, &c.

THIS is the *most wonderful curative agent* known in medical science. It has effected cures in *every stage of Consumption "UNPARALLELED IN THE ANNALS OF MEDICINE."* In *Nervous Debility* and *Dyspepsia*, the HYPOPHOSPHITES may be regarded as an almost sovereign remedy.

THE HYPOPHOSPHITES

Have a two-fold and *specific* action—on the one hand, *increasing the principle which CONSTITUTES NERVOUS ENERGY*; and, on the other hand, being the *MOST POWERFUL BLOOD GENERATING AGENTS KNOWN.* They act with *promptness* and *certainty* in *all general morbid conditions*, such as Chronic Bronchitis, Asthma, Scrofula, Marasmus, Anemia, Female Complaints, &c., and in all disorders of the Nervous or Blood Systems. Their effect upon the tubercular condition is IMMEDIATE—*all the general symptoms disappearing with a rapidity which is really marvelous.* They *increase nervous or vital energy*, relieve Cough, check Night Sweats, diminish Expectoration, improve the Appetite, arrest Diarrhœa, and PROMOTE REFRESHING SLEEP. *A FAIR TRIAL IS A CERTAIN CURE.*

WINCHESTER'S GENUINE PREPARATION

OF THE HYPOPHOSPHITES is the *only reliable form* of Dr. Churchill's Remedy, and is approved by the Medical Profession generally. *USE NO OTHER, OR ANY REMEDY CONTAINING IRON.*

☞ PRICES:—In 7 oz. Bottles, $1—Six Bottles for $5. In 16 oz. Bottles, $2—Three for $5. Circulars gratis. Sold by all respectable Druggists, and at the sole General Depot in the United States, by

J. WINCHESTER,
36 *John St., N. Y.*

THE SPECIFIC PILL

A SPECIFIC REMEDY FOR

Spermatorrhœa, or Seminal Weakness, and Genital Irritability in either Sex.

THIS is the only remedy for *Sexual Debility, Impotency, &c.*, which has the *approval of the medical profession.*—Its success has been most extraordinary—effecting cures in cases where all other medicines of treatment had failed. One to six boxes of the SPECIFIC PILL will permanently cure any case of Seminal Weakness, or its resulting Impotency, however *aggravated*, whether *constitutional*, or arising from *abuse* or *excess*.

IMPORTANT MEDICAL TESTIMONY.

"I have used your SPECIFIC PILL in many cases of Spermatorrhœa, and with the *most perfect success.*

"J. MILTON SANDERS, M.D., LL.D."

"We believe it to be as near a 'Specific' as any medicine can be. We have cured many *severe cases with from six to ten doses.*"—Dr. R. KEITH: *American Jour. of Med. Science.*

"I have found them *all that could be desired.* Their effect has been truly wonderful. E. P. DICKEE, M.D."

☞ This is not a Homœopathic Remedy, nor is there any mercury or other deleterious ingredients combined with it.

PRICE.—$1 per box; six boxes for $5. by mail, pre-paid. For sale at the sole General Depot in the United States, by

J. WINCHESTER,
36 *John St., N. Y.*

Amusement.

☞ A Frenchman, wishing to compliment a girl as a "little lamb," called her a "small mutton."

☞ Little troubles wear the heart out. It is easier to throw a bomb shell a mile than a feather—even with artillery.

☞ Great wealth in a woman tends to keep all a distance both the proud and the humble, leaving the unhappy life bait to be snapped at by the hardy and greedy.

☞ Many consider any sign of human occupation and existence in a room as being disorder—however reputable and respectable be the cause of it.

☞ "I wonder what makes my eyes so weak?" said a fop to a gentleman. "You needn't wonder—they are in a weak place," replied the gentleman.

☞ A curate having been overhauled by his bishop for attending a ball, the former replied, 'My Lord, I wore a mask.' 'Oh, well,' returned the bishop 'that puts a new face on the affair.'

☞ A subscriber to a moral reform paper called at the Post Office in New York one day, and inquired if the *Friend of Virtue* had come. 'No, replied the Post master, 'there has been no such person here for a long time."

☞ "Ah John, since you have been to the city the black ox died! without any notice whatever." "Gracious mercy!" replied John, "how fast we are all passing away!"

☞ "Do you think that raw oysters are healthy?" "Yes; I never knew one complaining of being out of health in my life."

☞ An old shoemaker in Glasgow was sitting by the bedside of his wife who was dying. She took him by the hand: 'Weel John, we're gawin to part. I has been a gude wife to you, John.' 'Oh, just middling, just middling, Jenny,' said John, not at all disposed to commit himself. 'John,' says she, 'ye maun promise to bury me in the auld kirk-yard at Stra'von, beside my mither. I could na rest in peace among unco folks, in the dirt and smoke of Glasgow.' 'Weel, weel, Jenny, my woman,' said John, soothingly, 'We'll just pit you in the Gorbals first, and gin ye dinna lie quiet, we'll try you sine in Stra'von.'

☞ George Smith, do you recollect the story of David and Goliah?' 'Yes sir. David was a tavern keeper and Goliah was an intemperate man.' 'Who told you that?' 'Nobody, I read it; and 'tis said that David fixed a sling for Goliah, and Goliah got slewed with it.' 'Wasn't Goliah a giant—a very strong man?' 'Yes, he was a giant, but he had a weak head.' 'How so?' 'Why, to get so easily slewed.' 'Yes George; but that was undoubtedly owing to the strength of the sling. Was not David a musician?' 'Yes sir. He played psalms on the harp—a favorite instrument with the Jews, and at the present day called a Jew's harp. I have one in my pocket—here it is. Place it to your mouth thus; breathe on the tongue gently; then stroke with your finger this way—and the psalms fructify on the ear as natural as thunder.' 'Take your seat.'

JOKE OR EARNEST.—The following exhibition of discretion and valor is equal to anything in Congress or out of it that has lately turned up; it was in Michigan:

Mr. Robins kept a grocery store.—His customers often disputed his accounts, and one of them, Mr. Jones, was very fierce in denying the justice of one of his charges. Robins was a small man, but often boasted he was enough for any one, and especially for Jones. One day Jones denied the correctness of his account, while Robins insisted it was all right.—In the heat of the discussion, Jones accused Robins of not telling the truth, and Robins dared him to repeat the accusation.

"I said that you lied, sir;" coolly responded Jones.

"Do you say that I lie?" demanded Robins, jumping up from his seat and unbuttoning his coat.

"Yes, sir," responded Jones.

"Are you in earnest?" continued Robins, jerking off his coat and approaching Jones.

"Yes, sir, I am in earnest," answered Jones, still keeping his seat.

"Well, if you are in earnest," said Robins, replacing his coat upon his back and himself in his seat, "it's all right, but mind you, I don't take such things in joke."

☞ Dr. Russell, correspondent of the London *Times*, is lying ill at a New York Hotel.

FRANCE AND THE SOUTH.—The Paris correspondent of the New York *Tribune* writes that the recognition of the Confederate States is close at hand. On which statement our New York contemporary remarks: "We are not surprised at the information. If we cannot put down rebellion, other nations will certainly have to admit that it has established a government *de facto*, and to recognise that Government accordingly.

THE NEW JAIL BURNED.—On Sunday morning last about two o'clock a fire broke out in the centre building of the new Toronto Jail. Great delays took place in bringing the fire engines, in consequence of the distance, and of ignorance of the direction of the fire. The fire has done its work effectually in the centre building and the loss is estimated at $30,000 of which 20,000 was insured. The fire is believed to have been the work of an incendiary.—*Guardian.*

STRONG REBEL TESTIMONY AS TO THE BLOCKADE.—Rebel testimony to the rigorous efficiency of the blockade of the Southern coast accumulated constantly. The latest is from the Memphis *Appeal*, of the 3rd inst., which declares that "the risk of running the blockade at present is too great, and comparatively *but a few are willing to encounter the losses that are so apt to follow the experiment.* It is understood that the rebel authorities have gone to the trouble to prepare a formidable schedule of skiffs, shallops and scows claimed to have evaded the vigilance of our cruisers, which they intend laying on the tables of the members of the French and English Parliaments against their approaching session, in the hope of persuading those Governments to raise the blockade. If evidence is to be offered on this score, it will not be very hard to offset the fraudulent list by an accumulated series of testimonials as to its efficiency from the Southern journals themselves—testimonials reluctantly wrung from those who have the best means of knowing its extraordinary rigor." *N. Y. Times.*

THE
People's Great Books!

The Horse and his Diseases:
BY ROBERT JENNINGS, V. S.
Professor of Pathology and Operative Surgery in the Veterinary College of Philadelphia, Professor of Veterinary Medicine in the late Agricultural College of Ohio, Secretary of the American Veterinary Association of Philadelphia, etc.
12mo., Cloth Extra. Price $1:25.

JENNINGS' GREAT WORK OF THE HORSE Tells you all about breeding and managing the animal with his various vices, and how they can be corrected.

JENNINGS' GREAT WORK OF THE HORSE Describes more than 150 diseases to which he is subject, and gives the various remedies best adapted to their cure;

JENNINGS' GREAT WORK OF THE HORSE Should be in the hands of every man who owns the animal. At a critical moment it may save you hundreds of dollars in horse-flesh.

THRILLING ADVENTURES
AMONG THE EARLY SETTLERS.
BY WARREN WILDWOOD, ESQ.
With 200 new and original engravings.
12mo., Extra Cloth. Price $1:25.

THRILLING ADVENTURES AMONG THE EARLY SETTLERS We venture to say is the most intensely interesting collection of stories ever issued.

THRILLING ADVENTURES AMONG THE EARLY SETTLERS While drawn from the most authentic sources, yet partakes of all the wild, weird and fearful character of romance.

THRILLING ADVENTURES AMONG THE EARLY SETTLERS With startling vividness brings before the mind of the reader many a deed of blood and carnage, many a scene of heroism and patient endurance.

The Family Doctor:
A Counsellor in Sickness, Pain, & Distress,
BY PROF. HENRY S. TAYLOR, M. D.
12mo., Cloth. Price $1:00.

TAYLOR'S FAMILY DOCTOR Is written in plain language, free from medical terms, and tells you how to cook, prepare drinks, and manage the sick generally.

TAYLOR'S FAMILY DOCTOR Describes nearly 150 distinct diseases to which men, women and children are subject, and gives the various simple remedies best adapted to their cure.

TAYLOR'S FAMILY DOCTOR Is written in plain language, free from medical terms, and may soon save you much suffering and many times the cost of the book. Every body wants it.

JUDSON'S
Mountain Herb Pills.

ABOVE, we present you with a perfect Blossom of Beauty, a child of a tribe of the strange Aztec Nation, that once ruled Mexico. You will find a full account of him and his people in our Pamphlets and Almanacs—to be had gratis, from the Agents for these Pills.

The inventor and manufacturer of "Judson's Mountain Herb Pills," has spent the greater part of his life in traveling, having visited nearly every country in the world. He spent over six years among the Indians of the rocky Mountains and of Mexico, and it was thus that the "MOUNTAIN HERB PILLS" were discovered. A very interesting account of his adventures there, you will find in our Almanac and Pamphlet.

It is an established fact, that all diseases arise from

IMPURE BLOOD!

The blood is the life! and when any foreign or unhealthy matter gets mixed with it, it is at once distributed to every organ of the body. Every nerve feels the poison and all the vital organs quickly suffer. The stomach will not digest the food properly. The liver ceases to secrete a sufficiency of bile. The action of the heart is weakened, and so the circulation is feeble. The lungs become clogged with the poisonous matter; hence, a cough and all diseases of the throat and lungs. A slight impurity at the fountain-head of life—the Blood! And if you had thrown some earth, for instance, in a pure spring, from which run a tiny rivulet, in a few minutes the whole course of the stream become disturbed and discolored. As quickly does impure blood fly to every part, and leave its sting behind. All the passages become obstructed, and unless the obstruction is removed, the lamp of life soon dies out.

These pills not only purify the blood, but regenerate all the secretions of the body; they are, therefore, universal as a remedy.

CURE FOR BILIOUS DISEASES,

Liver Complaint, Sick Headache, &c. This *Anti-Bilious Medicine* expels from the blood the hidden seeds of disease, and without all the harsh and mercurious pure and *purge*, cleansing and invigorating the vital organs.

Patent indeed, is it to us, that we are able to place within your reach, such a medicine like the "Mountain Herb Pills," that will pass directly to the affected parts, through the blood and fluids of the body, and cause the sufferer to brighten with the flush of beauty and health.

Judson's Pills are the Best Remedy in existence for the following Complaints:

Bowel Complaints,	Debility,	Inward Weakness,	
Costiveness,	Pleurisy,	Fever and Ague,	Liver Complaints,
Colds,	Female Complaints	Leucorrea of Sperm,	
Chest Diseases	Headache,	Piles,	
Coughs,	Indigestion,	Stone and Gravel,	
Consumption,	Dyspepsia,	Secondary Symptoms	
Dysentery,	Inflammation,	Dropsy,	
Diarrhea,			

GREAT FEMALE MEDICINE!

Females who value health, should never be without these Pills. They purify the blood, remove obstructions of all kinds, clear the skin of all pimples and blotches, and bring the rich color of health to the pale cheek.

☞ The Plants and Herbs of which these Pills are made, were discovered in a very surprising way among the Terracas, a tribe of Aborigines in Mexico. Get the Almanac of your Agent, and you will read with delight, the very interesting account it contains of the "GREAT MEDICINE" of the Indians.

Observe.—The Mountain Herb Pills are put up in a Beautiful Wrapper. Each box contains 40 pills, and Retail at 25 cents per box. All genuine, have the signature of B. L. JUDSON & CO. on each box.

B. L. JUDSON & Co.,
SOLE PROPRIETORS,
No. 50 Leonard Street,
NEW YORK.
☞ FOR SALE BY ALL RESPECTABLE DEALERS. ☜

Carlton's Condition Powders
THE GREATEST MEDICINE FOR
Horses, Cows, Sheep and Hogs.

THE receipt for *CARLTON'S CONDITION POWDERS* was obtained by us at a great expense, many years since. They are the Original and Genuine Articles, and although crowds of scurvy imitations have tried to counterfeit them, the name "*CONDITION POWDER*" is all they can imitate. Be not deceived—shun all other *so-called* Condition Powders, and get the

Genuine Carlton's

And your stock will show you the difference by the improved appearance, the glossiness of their coats, their renewed appetite, health and vigor. Nothing can equal these powders as a Condition Medicine.

The *CARLTON'S CONDITION POWDERS* given according to directions, are the best thing in the world to *strengthen* a horse, and to restore him to health and vigor, after severe exposure or hard driving.

These Powders cause a healthy action of the digestive organs, and purify the blood of animals, thereby equalizing the circulation of the blood, and imparting vigor to the whole frame. This soon demonstrates itself by an improvement in the appearance of the coat, for it is a certain fact that no animal can be in perfect health if the coat be rough and unthrifty.

CARLTON'S CONDITION POWDERS

Will be found a perfect *tonic and restorer* after attacks of any acute disease, such as Influenza, Strangles, Inflamation of the Lungs, Nasal Gleet, &c.

Everyone who owns stock of any kind should use the medicine; it is *always beneficial*, and is so harmless that it can always be given without fear.

Farmers who are Fatting their Stock should use these *CONDITION POWDERS*. They will keep all kinds of stock healthy and in good heart, and make them fatten much easier and quicker than otherwise would.

☞ Remember this Caution.

Find the signature in full on the wrapper of each package, J. CARLTON, Comstock.—This is the only test of the *true Carlton's Condition Powders.*

Take no "Condition Powders" without this signature

DR. BENTLEY, Agent. 1y31

Newmarket, October 9, '61. tf-36

Farmers, Attention!
KIRBY'S
Patent Combined
Reaper & Mower.

IN introducing the above Reaper and Mower to the attention of the farming community, the subscriber begs to say that it has
TAKEN THE FIRST PRIZE
in all the late fairs in the United States, as the best Mower and Reaper ever brought before the public. At those fairs it was placed in competition with both single Mowers and Reapers, as well as Combined Machines, and invariably obtained the premium. That it stands deservedly high in the estimation of farmers for its lightness of draft, strength, simplicity, durability and perfect work, hundreds of testimonials fully prove.

The Machine may be inspected at the residence of the undersigned, with whom all orders may be left for fulfilment.

O. FORD.
Newmarket, Sep. 4, 1861. tf-30
